TESTIMONIAL

I had never operated with any broker, I am paying to learn and with my losses I am developing a different way of working on the platform, I do not blame them for my losses because I lack the knowledge, planning, strategy and discipline that I am gradually getting, I fully trust in broker, I am a customer account STAYFOCUSKIM and I believe that I will continue to operate and reduce my loss over time, it may take months or a year but I will not give up, the platform is not complicated but it needs

I've just got started with forex and The Alert Nation have helped me so much. They gave me a free course and Jamie and Luke gave me their direct contact number so they could answer all my questions and guide me through everything. I've been placing my own trades from my own analysis which i've been taught from them how to do, and am making good money using low lot sizes. I've learned so much and am so grateful my friend recommended you guys.

Still getting to grips with Forex and applying that to the service (but that's my issue not down to the level of service received) The course is put together in a slightly crude manor but we pay for quality content not for fancy camera work so I'm very happy with what I have been sent so far. The price of the service doesn't break the bank either so it allows new people like myself who have been sat on the fence to get involved with no pressure. Would recommend to anyone

I initially found about Alert Team on TikTok, showing on my for you page for about a month, over time i made the final decision to try out their cheapest 19.99 package, within the first 5 days i turned over 10 times my membership fee, and as soon as possible i upgraded to their 49.99 membership, and since been cashing out more, no doubts these people are the most legit out there
